

RIPE

What Is Consensus?

Lessons learned from past policy proposals

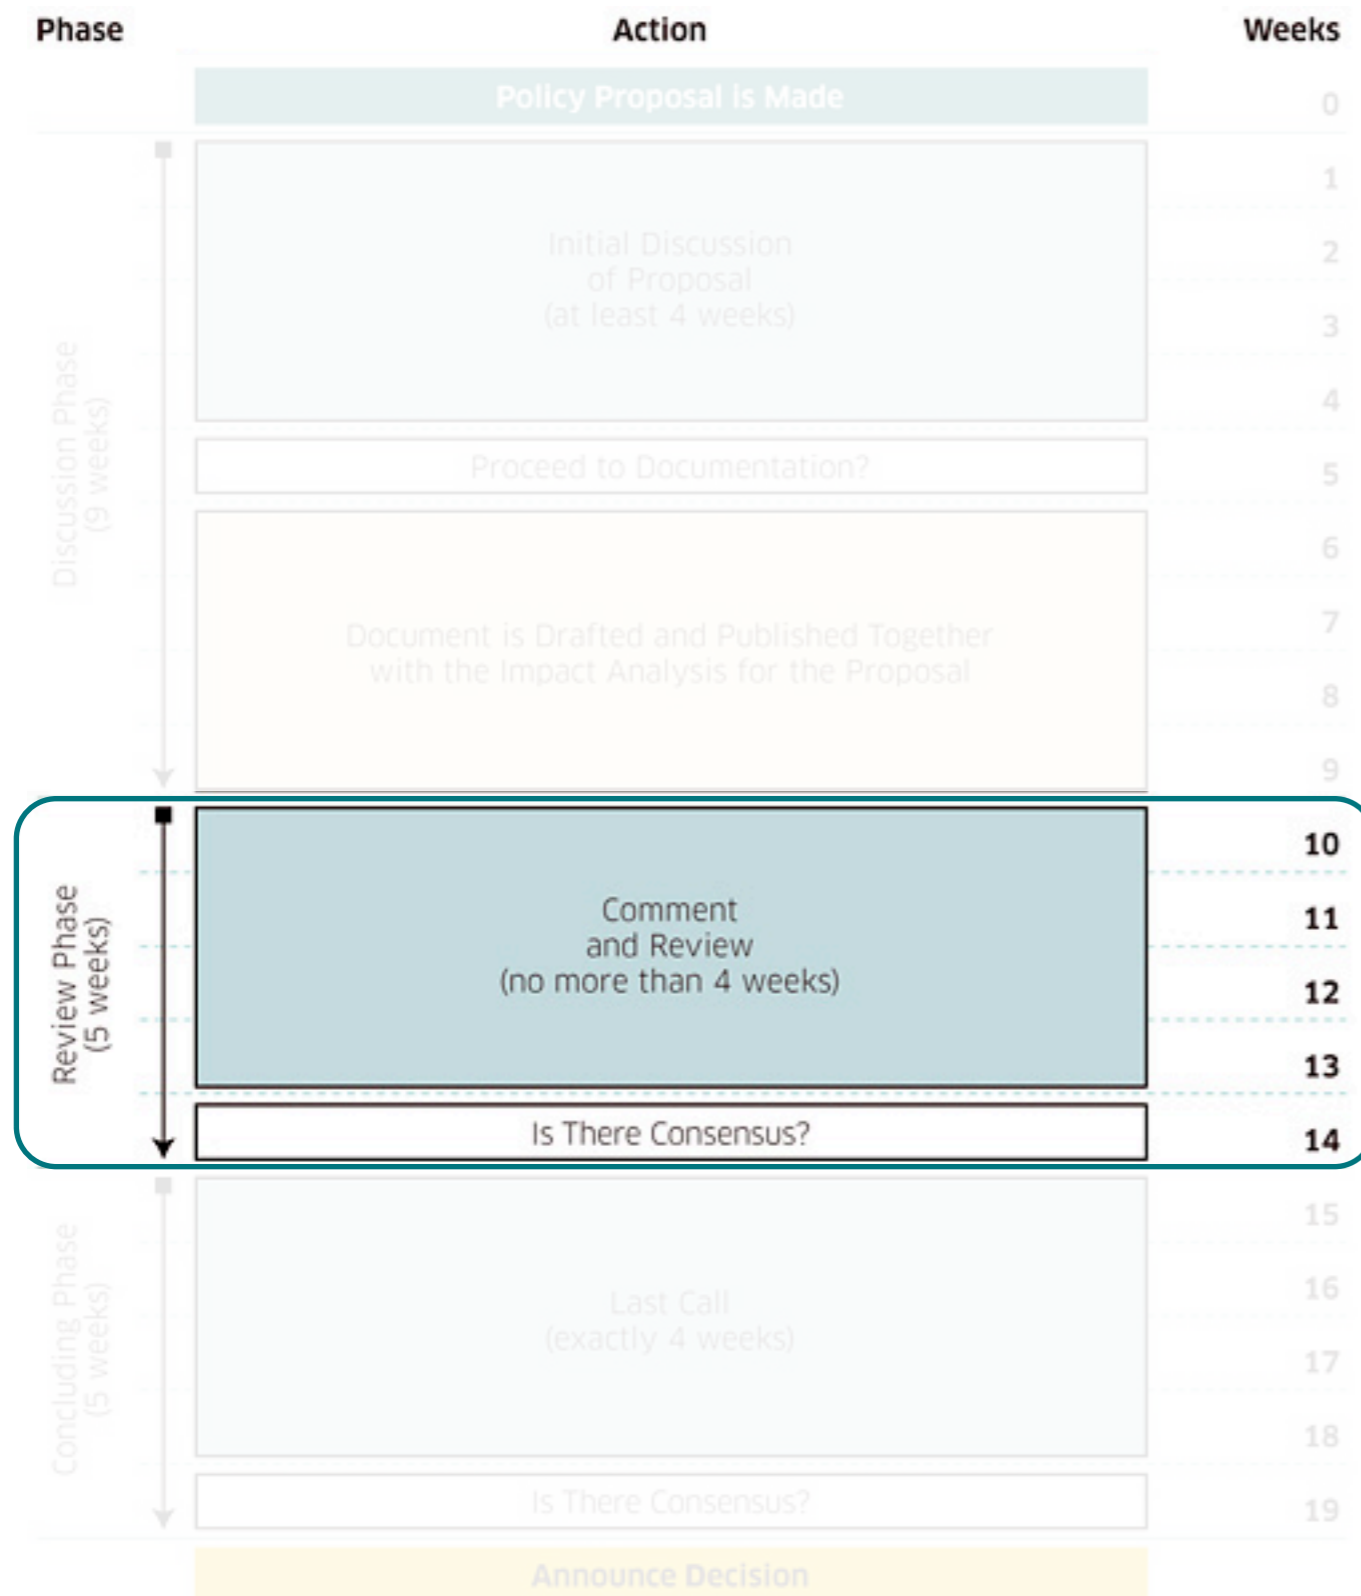

The Policy Development Process

- Discussion phase
 - Initial discussion
 - If there seems to be support for the idea:
 - Draft documents
 - RIPE NCC writes impact analysis
 - Go to Review phase

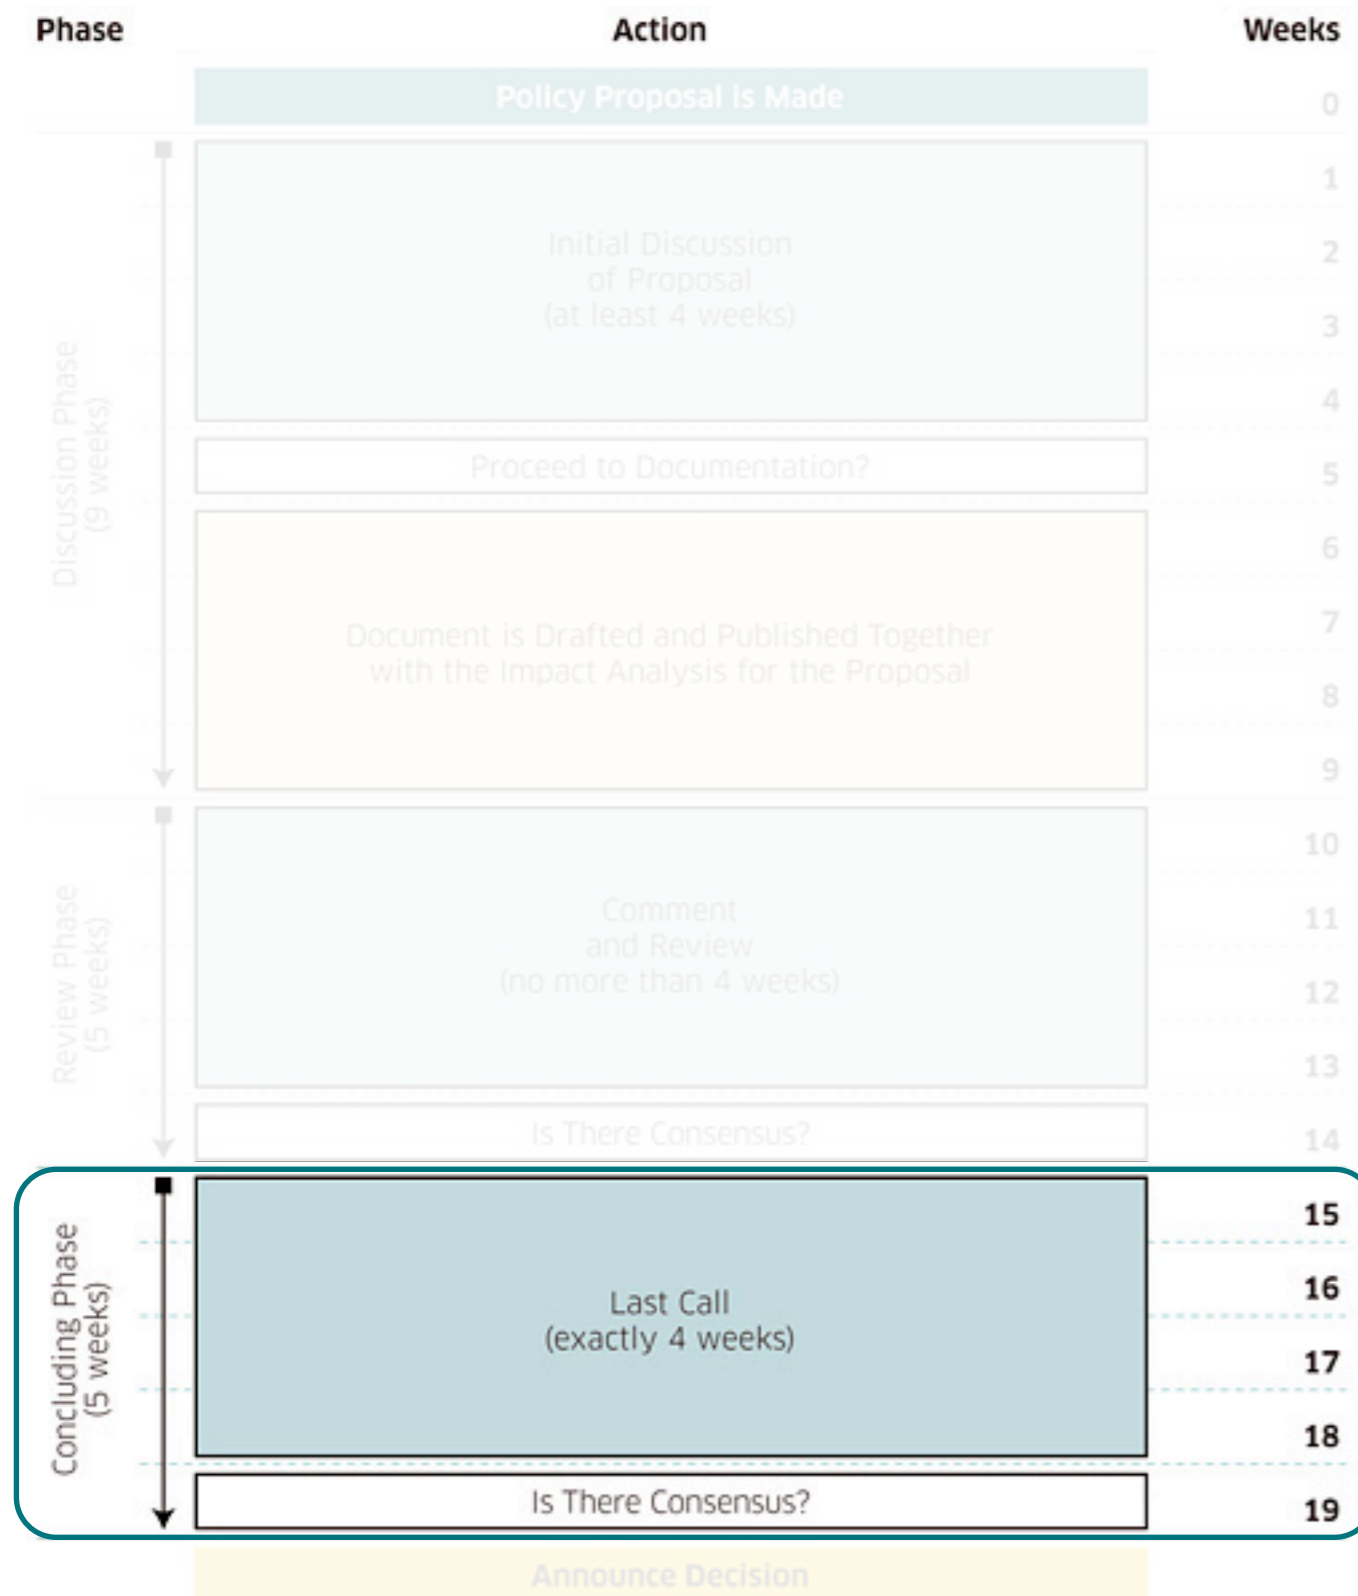

The Policy Development Process

- Review phase
 - Finalise wording
 - Determine if there is consensus
 - People need to speak up
 - If there is consensus:
 - Go to Concluding Phase, a.k.a Last Call

The Policy Development Process

- Concluding phase (a.k.a. Last Call)
 - Last opportunity to comment on and/or oppose the proposal
 - Consensus?
 - Silence is ok
 - If there is consensus:
 - Accept new policy

The rules

- “In all phases of the RIPE PDP, suggestions for changes to the proposal and objections regarding the proposal must be justified with supporting arguments.”

Two points where we need consensus

- Consensus at the end of the Review Phase
 - Silence is **not ok**: if there is no support for a policy then we shouldn't accept it
- Consensus at the end of the Concluding Phase
 - Silence is **ok**: if there is support for the policy (as seen in the Review Phase) and nobody objects then we should accept it
- Seems simple so far...

How we determine consensus

- The simple decisions:
 - Explicit support in the Review Phase
 - No remaining unanswered questions
 - Any objections have been withdrawn, or the justification for the objections has been shown to be invalid

When it becomes difficult

- Objections based on non-technical arguments
- How to determine if objections based on possible future impact are justified?
 - Arguments?
 - Counter arguments?

How do we deal with this

- If possible we try to make sure that every concern or objection is handled
 - Alter the proposal to deal with it, or
 - See that (fact based) counter arguments are provided
- But we can't block the PDP when there is strong support for a proposal but someone doesn't accept a solution or counter argument to his/her concerns or objections
- Consensus \neq Unanimity

How do we deal with this

- When consensus is not unanimous then we (your working group chairs) will have to make a judgement
 - Is there support for the proposal?
 - Is there a solution that will get unanimous support?
 - Is the opposition justified with supporting arguments?
 - Is there much support for the opposing arguments?
- We publish our reasoning

What if we are wrong?

- Discuss that on the mailing list!
- The collective of RIPE Working Group Chairs checks if we follow the process correctly
- The PDP has an appeals process

Questions?
